

Aditya Mathur

Delhi NCR, India

7982148858 | aditya.mathur5885@gmail.com | linkedin.com/in/aditya-mathurr | [Portfolio](#) | github.com/MadScientistt4

Technical Skills

Languages: Python, JavaScript, TypeScript, Java
Frontend: React, Next.js
Backend: Node.js, Express.js, Flask, FastAPI, REST APIs, Socket.io
Databases & Caching: PostgreSQL, MongoDB, MySQL, Redis
Cloud & DevOps: AWS (EC2, S3, IAM, Route53), Docker, GitHub Actions, CI/CD, Linux/Unix
AI & Automation: Generative AI APIs, Deep Learning, Web Scraping, Beautiful Soup, Puppeteer
Tools: Git, GitHub, Postman

Experience

FusionHive (Alps Insurance)

Jan 2026 - May 2026

Backend Engineering Intern

New Delhi

- Built backend services for a health insurance marketplace platform, integrating multiple insurer APIs including Kotak, IndusInd, Tata, and ICICI to support the end-to-end customer journey from quote generation to policy issuance.
- Managed the complete backend workflow across quote generation, proposal creation, KYC verification, payment processing, and policy issuance.
- Integrated the PayU payment gateway, handling secure payment flows, redirections, webhook validations, and transaction response processing.
- Improved backend scalability and reliability using Redis caching, Docker, and AWS EC2 deployments while collaborating in an Agile development environment.

Deloitte

Mar 2025 - Jul 2025

Capstone Program

Remote

- Designed a predictive maintenance system using accelerometer vibration data, applying Bernoulli-Euler beam theory and FFT-based signal processing to train a 1D CNN achieving approximately 88% fault detection accuracy.

Manipal The Talk Network (MTTN)

Sep 2024 - Mar 2025

Web Developer

Manipal, India

- Developed and deployed a Next.js and Express.js content platform with secure cookie-based authentication, admin dashboards for managing articles and videos, and AWS EC2 hosting while collaborating in a 5-member engineering team.

Projects

EY Techathon - RFP BidAssist AI Platform | FastAPI, React, Gemini (LLM)

Dec 2025

- Built an AI-powered RFP analysis platform that parses government tender PDFs and extracts 10-15 technical and compliance requirements per document.
- Developed LLM-based agents to match extracted requirements with 100+ internal product datasheets, recommending the top 3 products per requirement.
- Automated generation of structured scope-of-supply and compliance reports, reducing manual bid preparation time by 60-70%.

Manipal Hackathon - Football Platform | MERN, WebSockets, JWT

Oct 2024

- Led a 5-member team to win the Best Hack Award (INR 10k) among 400+ teams at Manipal Hackathon 2024.
- Engineered a real-time chat system using Socket.io, supporting 100+ concurrent users with low latency and reliable bidirectional communication.
- Implemented a secure full-stack platform with JWT-based role-based authentication, automated web scraping pipelines, and Razorpay payment integration for end-to-end workflows.

StoryToComic - AI Comic Generator | MERN, AI APIs

Apr 2024

- Designed a 3-stage AI pipeline involving story parsing, prompt generation, and image generation using OpenRouter and Pollinations APIs to automatically generate comic panels from user stories.

Education

Manipal Institute of Technology (MIT)

2022 - 2026

B.Tech in Information Technology, CGPA: 8

Manipal, India
